Email: georgemraz@brightonbest.com

To: Our Valued Customers

From: George Mraz

Date: June 6, 2005

To whom it may concern,

We hereby certify that parts supplied by Brighton Best Socket Screw Mfg. Inc., other than those that we supply as Zinc or Cadmium plated do not contain the following items; mercury, lead, hexavalent chromium, polybrominated biphenyls (PBB's), or polybrominated diphenylethers (PBDE's). These non-plated parts are therefore in compliance with the European Union RoHS and WEEE directives regarding hazardous substances. Our zinc-plated products currently contain hexavalent chromium and are not in compliance with those standards. We are working with our suppliers and will have compliant zinc plated parts in stock no later than December 31, 2005. These compliant parts will be sold using unique part numbers to differentiate the compliant and non-complaint inventory.

If you have any questions please contact us at the above numbers.

Sincerely,

George R Mraz

Director of Material Management
